Native plants!

We moved to a new house last November, and I had to start all over with plants. We're now on a small city lot, but we're planting trees and shrubs and gardens – all native! Here are a couple pics of our accomplishments. Pic 1, 2 beds with arrowwood viburnum (protected by fencing) in the back. Pic 2, a rain garden. From all the rain we have had, it has its work cut out for it. ☺
